

# VISHWA BANDARA

• Colombo, Sri Lanka • +94-760678411 • [vishwaaloka16@gmail.com](mailto:vishwaaloka16@gmail.com) • [vishwa-aloka-16.github.io](https://github.com/vishwa-aloka-16)

## PROFESSIONAL SUMMARY

---

Data Science student with previous experience in data warehousing and analytics, seeking a challenging position in the field of data science. Skilled in data engineering, AI/ML engineering, and data science, with a strong interest in contributing to innovative projects while developing experience in decision making and problem solving.

## EXPERIENCE

---

### Enterprise Data Warehousing and Data Analytics – Internship (6 Months)

Sep 2025 – Mar 2026

National Development Bank (NDB)

Colombo 02

- Automated the reconciliation process between two internal system databases using Python (Pandas/NumPy), significantly reducing processing time and improving operational efficiency.
- Partnered with external consultants at BCG to support a machine learning infrastructure project, by building the data transformation pipeline to convert raw data into features.
- Created 5+ analytical dashboards(Power BI) to track bank savings strategies and analyze customer demographics.
- Developed a tool to automatically generate a data dictionary, creating a metadata catalog for any database that helps analysts quickly locate and understand available data.

## EDUCATION

---

### Bachelor of Science (B.Sc.) Honours in Data Science

Jun 2024 - Present

Sri Lanka Institute of Information Technology (SLIIT)

Colombo

### Bachelor of Science (B.Sc.) Physical Sciences

2025 - Deferred

University of Sri Jayewardenepura

Colombo

### Kingswood College Kandy

Jan 2021 – Dec 2023

Advance Level Physical Sciences

Kandy

## PROJECTS

---

### Ross: Legal workspace with dynamic RAG systems (GraphRAG, RAPTOR)

Tools: Gemini 3, Scikit-learn (GMM), GraphRAG, RAPTOR, Node.js, FastAPI, MongoDB, Supabase

- Legal intelligence workspace that helps law professionals analyze long, complex legal documents by utilizing a RAG pipeline to vectorize and analyze complex legal documents during inference
- Optimized model orchestration across multiple LLMs for text embeddings, summarization, and conversions, maintaining document ingestion costs under \$0.05 per 10MB.
- Utilized multiple classification models(GMM) to format unstructured files into custom text windows based on document type, publishing the technical findings as a Medium article.

### Automated Multi-Source Social ETL Framework

Tools: Python, Supabase, Apache Airflow, GitHub, JSON, Power BI

- An automated ETL pipeline designed to monitor and ingest brand mentions and public sentiment across social media platforms (Reddit/X).
- Developed a modular extraction engine using Apache Airflow that allows for rapid switching of target brand keywords and provide results as a Power BI dashboard
- Implemented text processing and sentiment scoring to transform unstructured data into structured, categorical business intelligence

## FlyCast: Flight Delay Prediction Open-Source Web API

Tools: Python, Pandas, Scikit-learn, Flask, Tailwind CSS, JavaScript

- Designed a web API to predict flight delays and cancellations using classification models.
- Trained machine learning models in Python with XGB Classifier, using domestic US flight data. Created a API endpoints and detailed documentation with API references.
- Created a responsive user interface allowing users to check upcoming flights and view predicted delay/cancellation outcome.

## SKILLS

---

- **Programming Languages:** Python, Java
- **Data Engineering Tools:** Apache Airflow, Big Query, Snowflake
- **AI/ML Tools:** Pandas, NumPy, Scikit-learn, LlamaIndex, LangChain, GraphRAG, RAPTOR
- **Database Tools:** MongoDB, MSSQL, MYSQL, Supabase, Chroma, Pinecone
- **Business Intelligence Tools:** Power BI, Tableau
- **Web Technologies:** Node JS, React, Express, JSP/Servlet, Spring Boot, Tailwind, Flask, Fast API

## AWARDS AND HONORS

---

### Dean's List Award 2025

January 2026

Issued by Sri Lanka Institute of Information Technology

Faculty of Computing Certification of Excellence in recognition of academic excellence in the year 2025

## CERTIFICATIONS/COURSES

---

- |                                                                            |          |
|----------------------------------------------------------------------------|----------|
| ▪ Intro to Snowflake for Devs, Data Scientists, Data Engineers [Snowflake] | Ongoing  |
| ▪ Build RAG Applications: Get Started [IBM]                                | May 2026 |
| ▪ Generative AI Applications: Get Started [IBM]                            | Apr 2026 |
| ▪ Introduction to Data Engineering [IBM]                                   | Dec 2025 |
| ▪ Introduction to Data Engineering on Google Cloud [Google Cloud]          | Jun 2026 |

## ADDITIONAL INFORMATION

---

**Languages:** English (Full Professional Proficiency), Sinhalese (Native)
